SOP-D Voucher and discount approval

Leakage rank 1 of 3 | 3,600 exceptions | Value at risk R$ 295,795 (1.92% of delivered billed value)

Owner	Commercial Manager (approver); Revenue Assurance Analyst (monitor)
Frequency	Per order (preventive); monthly review (detective)
Source finding	Revenue Assurance Review, finding F1

Purpose

Stop voucher-funded discounts above the 10% cap from reaching billing without approval.

Scope

All orders where a voucher, coupon or promotion reduces the amount the customer pays.

Procedure

1. Set the cap in the promotion engine: 10% of order value per order unless an approval code is attached.
2. Campaign owner submits each campaign with budget, eligible products and maximum voucher share; Commercial Manager signs before launch.
3. At checkout the engine rejects a voucher above the cap unless a valid approval code is present.
4. Revenue Assurance runs the voucher-share report each month: every order above the cap with no approval code.
5. Analyst traces each exception to the campaign, confirms or rejects it, and logs the root cause.
6. Unapproved campaigns are suspended; the Finance Controller books the excess as promotional cost.

Key controls

ID	Control	Type	Frequency	Evidence kept
D-1	Engine blocks voucher above cap without approval code	Preventive, automated	Per order	Engine rule config; blocked-order log
D-2	Campaign sign-off before launch	Preventive, manual	Per campaign	Signed campaign form
D-3	Monthly voucher-share exception report	Detective, manual	Monthly	Report, trace notes, sign-off

Monitoring and escalation

Orders above cap with no approval code: target zero. Voucher-funded value as a share of billed value: tracked monthly. Exceptions open longer than five working days go to the Finance Controller.

Review: SOP reviewed annually or after any change in policy limits. Records kept for the audit retention period.

SOP-P Price list control and variance review

Leakage rank 2 of 3 | 1,308 exceptions | Value at risk R$ 21,239 (0.14% of delivered billed value)

Owner	Pricing Manager (list); Revenue Assurance Analyst (review)
Frequency	Per order (preventive); weekly review (detective)
Source finding	Revenue Assurance Review, finding F2

Purpose

Make sure the price billed matches the approved list price within a 10% tolerance.

Scope

All item lines on delivered orders, every product and seller.

Procedure

1. Pricing Manager keeps one approved price list with effective dates; every change needs a second approver.
2. Order system compares the billed unit price with the list price at order creation; variance beyond 10% is held for review.
3. Revenue Assurance runs the weekly price variance report: lines below list and lines above list, by product and seller.
4. Under-billed lines: confirm whether a price change was approved; if not, correct the list or the listing and record the loss.
5. Over-billed lines: refund or correct before the customer disputes the charge.
6. Repeat offenders (same product or seller on three consecutive reports) go to the Pricing Manager.

Key controls

ID	Control	Type	Frequency	Evidence kept
P-1	Approved price list with dated changes and second approver	Preventive, manual	Per change	Change log with approver
P-2	Order-time check of billed price against list; hold above tolerance	Preventive, automated	Per order	System rule; hold queue
P-3	Weekly price variance report	Detective, manual	Weekly	Report, resolution notes

Monitoring and escalation

Lines outside tolerance as a share of lines tested; value under-billed and over-billed each week. Exceptions open longer than five working days go to the Finance Controller.

Review: SOP reviewed annually or after any change in policy limits. Records kept for the audit retention period.

SOP-U Order-to-cash match for delivered orders

Leakage rank 3 of 3 | 18 exceptions | Value at risk R$ 341 (<0.01% of delivered billed value)

Owner	Accounts Receivable Lead
Frequency	Daily
Source finding	Revenue Assurance Review, finding F3

Purpose

Make sure every delivered order is billed and paid in full, or the gap is explained.

Scope

All orders with status delivered, matched order by order.

Procedure

1. Each day, list orders that reached delivered in the last 24 hours.
2. Match billed value (items plus freight) to payments received; flag any gap above R$ 1.00.
3. Flag delivered orders with no payment record and delivered orders with no delivery date.
4. Collections follows up each flagged order within two working days.
5. Any write-off of a short payment needs Finance Controller approval and a reason code.
6. Close the day only when every flagged order is resolved or has a named owner and date.

Key controls

ID	Control	Type	Frequency	Evidence kept
U-1	Daily delivered-order to payment match	Detective, automated	Daily	Match report
U-2	Hold at carrier handover for orders with no payment	Preventive, automated	Per order	Hold log
U-3	Write-off approval with reason code	Preventive, manual	Per write-off	Approved write-off form

Monitoring and escalation

Delivered orders unpaid or short-paid at day 7; value outstanding. Exceptions open longer than five working days go to the Finance Controller.

Review: SOP reviewed annually or after any change in policy limits. Records kept for the audit retention period.

Control checklist, ranked by value at risk

Use at each review cycle. Tick when the control ran and evidence is filed.
